

RIVER MILE 10.9 REMOVAL ACTION PERIMETER AIR MONITORING PROGRAM WEEKLY REPORT

Summary of perimeter air monitoring for the week ending October 6, 2013

Dredging operations, which began on August 3, 2013, are being continuously monitored to ensure that air quality is maintained at acceptable levels. To monitor air quality, a number of sampling locations have been established as shown on the map below.

Operations were conducted within acceptable air monitoring limits.

** This hydrogen sulfide monitor is located adjacent to the weather station.

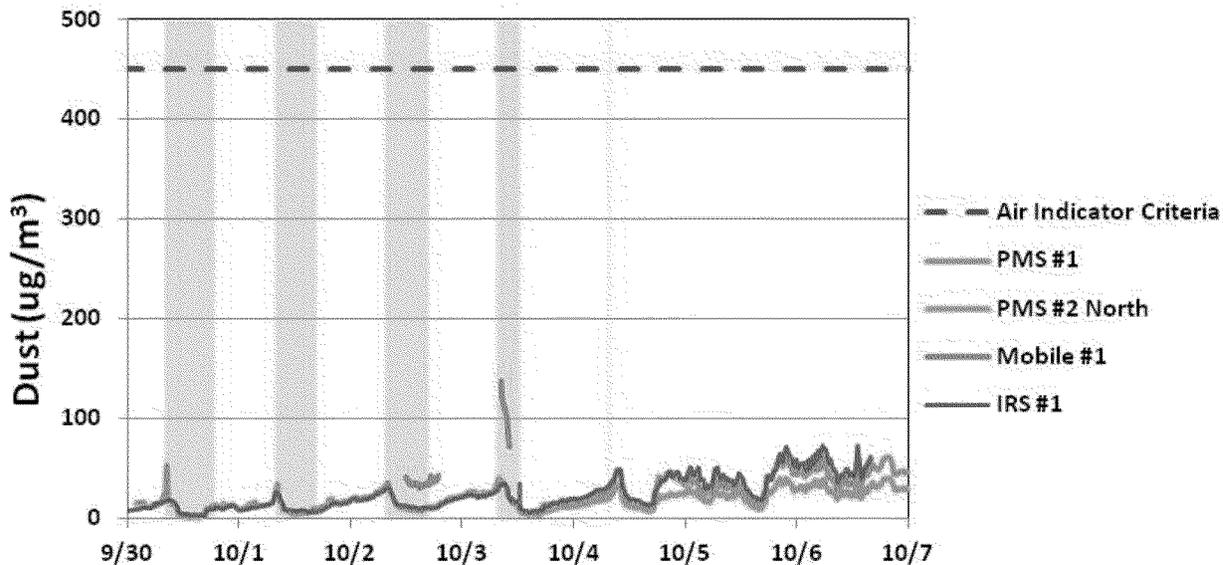

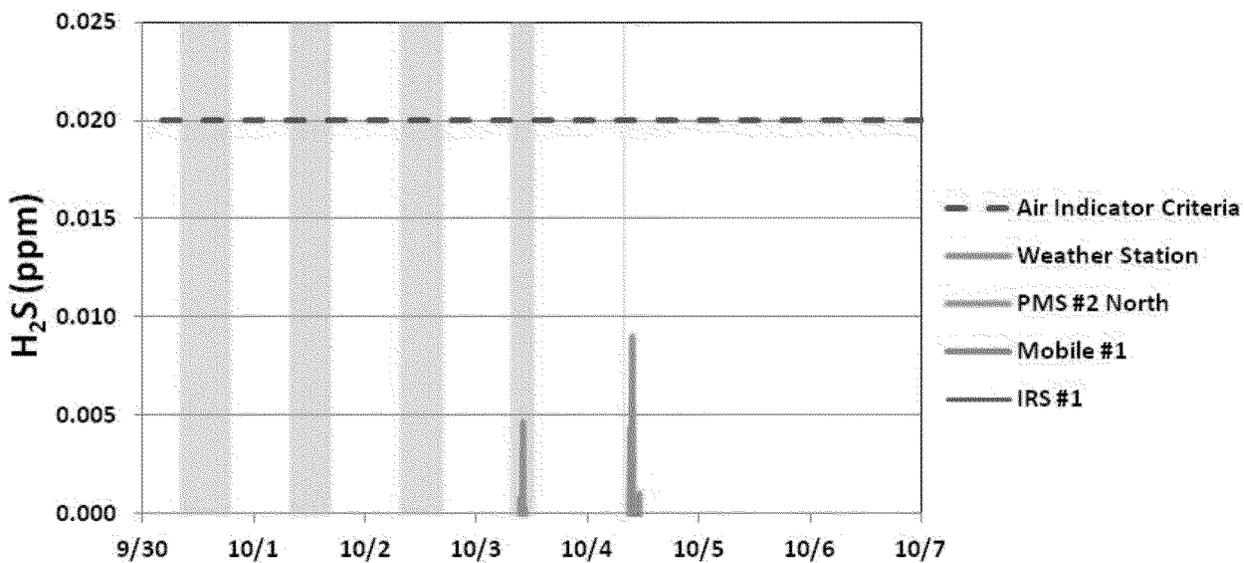

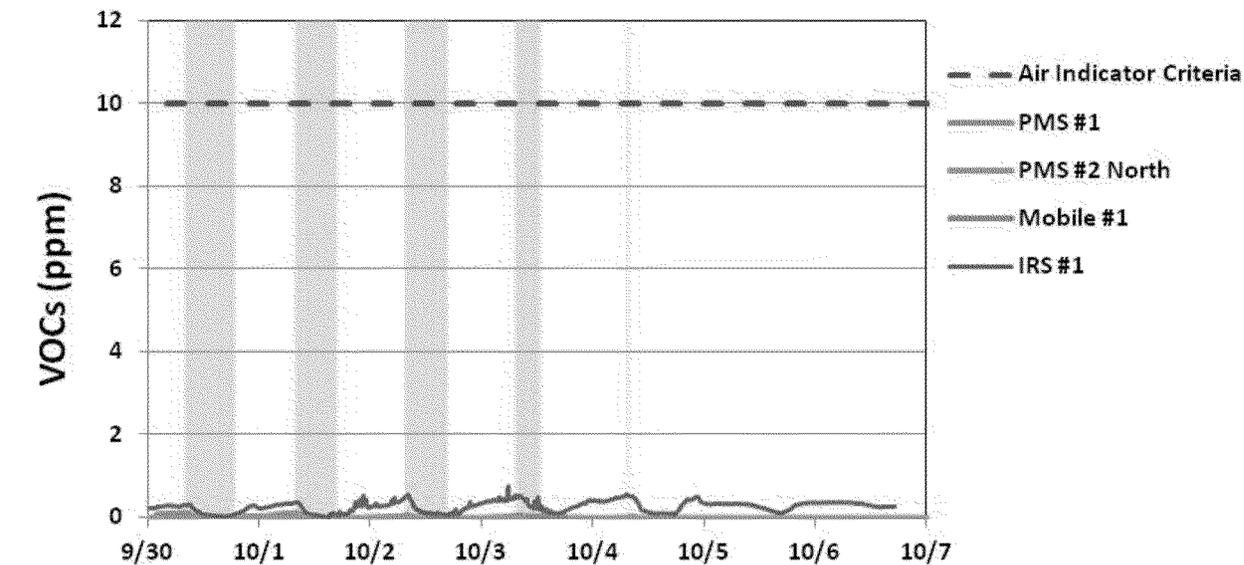

Key: H₂S = hydrogen sulfide; NS = not sampled; VOC = volatile organic compound

Units: ppm = parts per million; ug/m³ = micrograms per cubic meter

* Odor indicator, criterion not associated with elevated health risk
